

Subject Index to Volume 34

A

- Acetylcholine**
cerebral circulation and, after hypercapnia and ischemia (goat), R1410
immobilization-induced hypoglycemia, gastric vagus mediation of, R609
nitric oxide response, DOCA-salt hypertension, R568
- Acid-base balance**
hypothermia, hypoxia (alligator), R1339
intracellular, temperature effects (newt and salamander), R1162
- Acidosis, respiratory, carbon dioxide and pH effects on aldosterone, adrenal cells, R820**
- ACTH: see Adrenocorticotropin**
- Acylglycerols, selective retention, essential fatty acids, R414**
- Adenohypophysis, gonadotropin II release, GABA stimulation of, R348**
- Adenosine, modulation, cardiac neuronal activity, R914**
- Adenosine monophosphate, cyclic carbon dioxide and pH effects, aldosterone, adrenal cells, R820**
dissociated eccrine cells, volume-activated potassium and chloride pathways, R990
- Adenosine triphosphate**
anoxic suppression of, hepatocytes (turtle), R1020
modulation, cardiac neuronal activity, R914
turnover, anoxia effects, hepatocytes (turtle), R41, R49
- Adenylate cyclase, antidiuresis, sex differences, R1284**
- Adipocytes**
brown
norepinephrine- and insulin-resistant glucose transport, R577
protein synthesis, norepinephrine effects (hamster), R103
- Adipose tissue**
brown: see Brown fat
fasting hypertriglyceridemia, ventromedial hypothalamic obesity, R786
white, uncoupling protein in (goat), R676
- Adrenal cells, aldosterone response to hypoxia, carbon dioxide/pH effects, R820**
- Adrenal cortex, compensatory growth response, basic fibroblast growth factor mediation of, R1253**
- Adrenalectomy**
blood pressure, nonadrenergic control of (lamb), R530
enterostatin and, obesity, R21
- Adrenal gland**
catecholamine release, VIP and, R766
stimulation-induced catecholamine secretion, nifedipine effects, R28
- Adrenal medulla, mediation, diet-induced hypertension, R1**
- β -Adrenergic agonists, intrinsic cardiac neuronal activity modulation, R659**
- Adrenocorticotropin**
secretion, hypothalamic peptide regulation of, pituitary (sheep), R840
thromboxane effects, fetus, R858
- Afferent nerves**
carotid, activation, phrenic nerve responses to, R811
laryngeal, nucleus of solitary tract, R269
renal, spinal neuronal responses to activation, R1291
somatic, neurons of rostral ventrolateral medulla, R35
vagal, gastric load and CCK synergism in, R872
visceral, neurons of rostral ventrolateral medulla, R35
- Aging**
nitric oxide effects, renal microvasculature, males, R1126
suprachiasmatic nucleus oscillations and, R1216
- Alanine, muscular fatigue and recovery (squid), R157**
- Alcohol, chronic consumption, sensitivity to CCK and, R211**
- Alcoholism, sensitivity to CCK and, R211**
- Aldosterone**
blood pressure and, anterior forebrain, R826
response
chronic intravenous EGF infusion (sheep), R203
hypoxia, carbon dioxide/pH effects, adrenal cells, R820
salt appetite and, R7
- Amiloride, secretory mechanisms and, co-ionic (pig), R57**
- Amino acids**
differential timing, suprachiasmatic hypothalamus, R504
excitatory, light-induced phase shifts and *c-fos* expression (hamster), R1191
food intake effects, suckling, R334
neurotransmitters, gonadotropin II secretion (fish), R348
transport, volume-regulatory, erythrocytes (skate), R173
- γ -Aminobutyric acid**
constrictor pathway, hypothalamus to medulla, R1311
stimulation, gonadotropin II secretion (fish), R348
- Amino-terminal propeptide, type III procollagen, circulating, awake state (pig), R139**
- Ammonium, muscular fatigue and recovery (squid), R157**
- Anesthesia**
carotid baroreflex, during hemorrhage, R195
deep halothane, cerebrovasodilation preserved in, R187
sympathetic nerve activity and, R792
- ANF: see Atrial natriuretic factor**
- Angiotensin**
carbon dioxide and pH effects, aldosterone, adrenal cells, R820
neurotransmitter, subfornical organ efferents to PVN, R302
prostaglandins and, during volume expansion, R1469
- Angiotensin-converting enzyme, inhibition, salt appetite and, R7**
- Angiotensin II**
blood pressure and, anterior forebrain, R826
central injection, pressor response from, periaqueductal gray role in, R1052
intracerebroventricular, urinary responses to, arterial baroreceptor input to, R591
intrarenal, neural control and, renal function, R392
microinjection, area postrema, cardiovascular consequences of, R625
nitric oxide interaction, blood flow distribution and, R1276
pituitary secretion, hypothalamic peptide regulation of (sheep), R840
pressor response to, autonomic blockade of, pregnancy, R1270
- Anion channels, transport, transepithelial, DPC effects (fish), R66**
- Anorexia**
CCK-mediated, abdominal vagotomy effects, R602
experimental cachexia, cytokines in, R376
- Anoxia**
hepatocytes, microcalorimetry in, R1014
plasma protein effects, brain calcium channels (turtle), R277
protein phosphorylation and (turtle), R1380
protein synthesis and, mitochondria, embryo, R1238
reduced ionic conductance (turtle), R929
suppression of sodium-potassium-ATPase, constant membrane potential and (turtle), R1020
survival, antioxidant defenses (snake), R646
- Antidiuresis, vasopressin, sex differences of, R1284**
- Antidiuretic hormones: see Vasopressin**
- carotid baroreflex, during hemorrhage, R195**
response, hemorrhage, blockade of cardiac nerves and, R220
- Antiestrogens**
behavior and energy balance, brain and, 1399, R1392
energy balance, estrous behavior and (hamster), R559
- Antioxidant enzymes**
acute exercise effects, skeletal muscle, R1344
defenses, freezing and anoxia survival (snake), R646
- Antipyretics, vasopressin, brain oxytocin effects, R151**
- Anti-TNF- α antibodies, body temperature and, tumor-bearing rats, R615**
- Aortic nerve, pressure change effects, NTS, R1355**
- Area postrema**
c-fos expression, CCK release effects, R235

- Area postrema (*continued*)
 vasopressin and angiotensin actions, cardiovascular consequences of, R625
- Arteries, gill, cardiovascular actions of urotenin II (dogfish), R573
- Arterioles, renal, hypertension and, pioglitazone attenuation of, R726
- Aspartate, differential timing, suprachiasmatic hypothalamus, R504
- Atrial natriuretic factor
 fetal responses to, autonomic modulation of, R596
 sodium-retaining actions and, insulin, R584
- Atrial natriuretic peptides
 biological actions of, thoracic inferior vena caval constriction, R1416
 blood pressure and, anterior forebrain, R826
 localization, chondrocytes, gill cartilage (eel), R474
 metabolism, single-pass gill extraction (fish), R124
 receptors: *see* Receptors
 sodium chloride absorption and, colon (pig), R57
- Autonomic control, emesis, plasticity of, irradiation (ferret), R1092
- Autonomic nervous system
 control of emesis, plasticity of, irradiation (ferret), R1092
 modulation, responses to ANF, fetal, R596
 stress- or interleukin-1-induced response, central CRF antagonist effects, R834
- AVP: *see* Vasopressin, arginine
- Awake state
 carotid baroreflex, during hemorrhage, R195
 circulating amino-terminal propeptide, type III collagen (pig), R139
 intravenous infusions, lymphatic pressure and (sheep), R703
 pregnancy
 atrial stretch, renal response to, R902
 erythropoietin and red blood cell mass during, R399
 renal blood flow, vasopressin and, R934
 spontaneous hypertension, impairment of renal function and, R943
 sympathetic nerve activity and, R792

B

- Bacteremia, host defense, sustained sleep deprivation effects, R1148
- Bacterial infection, endotoxin stimulation, dehydration signals controlling thirst, R1043
- BAY K 8644, stimulation-induced catecholamine secretion and, adrenal, R28
- Bethanechol chloride, modulation, intrinsic cardiac neuronal activity modulation, R659
- Bioactive hormones, iontophoretically applied, blood pressure effects of, anterior forebrain, R826
- Blockade
 autonomic, pressor response to angiotensin II in pregnancy, R1270
 cardiac nerves, hemorrhage and, R220
- Blood flow: *see also* Circulation
 calorogenic response to glucagon, cold ac-

- climation, skeletal muscle (duckling), R1084
- cerebral
 deep halothane anesthesia effects, R187
 hypoglycemia, catecholamines and, R883
 superhypercapnia effects, R974
- cold acclimation, nonshivering thermogenesis in, skeletal muscle (duckling), R1076
- cutaneous, arginine vasotocin effects (toad), R426
- distribution, angiotensin II, nitric oxide interaction, R1276
- renal, vasopressin and, awake state, R934
- Blood pressure: *see also* Pressure
 blood flow distribution, angiotensin II, nitric oxide interaction, R1276
 cardiac baroreflexes, vasopressin V₁ receptors and, R524
 gravity and the heart, R715
 high, maintenance, hypertension, R180
 iontophoretically applied hormones and, anterior forebrain, R826
 joining peptide effects, genetic hypertension, R1184
- response
 exercise training effects, R365
 nonadrenergic control of (lamb), R530
 treadmill exercise (horse), R409
- rostral ventrolateral medulla, neurons, somatic and visceral input to, R35
- stress- or interleukin-1-induced response, central CRF antagonist effects, R834
- sympathetic preganglionic neurons, raphe pallidus excitation of, R82
- thromboxane effects, pregnancy, R772
- vasopressin, renin, and cortisol responses, blockade of cardiac nerves and, R220
- Blood volume: *see also* Volume
 responses to ANF, autonomic modulation of, fetus, R596
- Body
 composition
 antiestrogen effects, 1399, R1392
 energy balance in pregnancy (hamster), R563
 GCR and, R146
 tamoxifen effects (hamster), R559
 size, genetic development, R957
- Bradykinin, renal sensory receptor activation by, prostaglandins in, R544
- Brain
 behavior and energy balance, antiestrogen effects, 1399, R1392
 calcium channels, inhibition by plasma proteins, anoxia (turtle), R277
 choroid plexus, transthyretin gene expression (lizard), R982
 glycogen, parenteral nutrition effects, R1387
 hexokinase activity, heart failure and, R923
 injury, lactate and pH dissociation in, R697
 lactic acid transport, carrier-mediated, R282
 metabolism, electrocortical activity and, chronic hyperglycemia, fetus (lamb), R1262

- oxytocin, modulating vasopressin antipyrretic action and, R151
- reduced ionic conductance (turtle), R929
- suprachiasmatic nucleus, oscillations, aging effects, R1216
- suprachiasmatic slice, circadian rhythms, somatostatin effects, R1199
- Brain-gut axis, acute colon inflammation, feeding and, R1001
- Brain stem
 c-fos expression, CCK release effects, R235
 rostral ventrolateral medulla, neurons, somatic and visceral input to, R35
- sympathetic oscillations and, R1026
- Brown fat
 cold-defense function, during sleep, R1060
 glucose transport, norepinephrine- and insulin-resistant, R577
 protein synthesis, norepinephrine effects (hamster), R103
 uncoupling protein in (goat), R676
- Bumetanide, secretory mechanisms and, colonic (pig), R57

C

- Cachexia
 experimental, cytokines in, R376
 temperature and food intake responses, anti-TNF- α antibodies, R615
- Calcium
 latent learning, R1480
 regulation, blood, stomach, R1376
 secretory mechanisms and, colonic (pig), R57
- Calcium agonists, stimulation-induced catecholamine secretion and, adrenal, R28
- Calcium channels, brain, plasma protein effects, anoxia (turtle), R277
- Calcium ions, flux, during sepsis, skeletal muscle, R487
- Calorimetry
 direct and indirect
 anoxic hepatocytes, R1014
 circadian rhythms of thermoregulation (squirrel monkey), R781
- Camostat, feeding and fasting, exocrine pancreas, R896
- cAMP: *see* Adenosine monophosphate, cyclic
- Cancer, impairment of insulin action in, R356
- Capsaicin, micturition and, R132
- Captopril
 thirst, arterial pressure and, R591
 water intake, endotoxin stimulation of thirst, R1043
- Carbachol, secretion, autonomic neural control, R246
- Carbohydrates
 gastric emptying, CCK control (monkey), R371
 starch and oil preferences, olfaction in, R1404
- Carbon dioxide
 effect on aldosterone response, hypoxia, adrenal cells, R820
 ventilatory, optical activity changes induced by, medullary surface, R494
- Cardiac output
 blood flow distribution, angiotensin II, nitric oxide interaction, R1276

- pressor response to angiotensin II, pregnancy, R1270
- Cardiorespiratory regulation, arterial pressure changes, neuronal responses to, R1355
- Cardiovascular defense reaction, dorsal periaqueductal gray stimulation effects, R1155
- Cardiovascular regulation, central, baroreceptor-chemoreceptor interactions, R14
- Cardiovascular responses, integrating behavior and, R1458
- Carotid sinus nerve, activation, chemoreceptor integration, R811
- Catabolic state, calcium ion flux, during sepsis, skeletal muscle, R487
- Catecholamines
- adrenal, release, VIP effects, R766
 - adrenal medullary, mediator of diet-induced hypertension, R1
 - blood pressure maintenance, genetic hypertension, R180
 - circulating, cardiovascular actions (dog-fish), R573
 - glucoregulation and, exercise, R1333
 - hypoglycemia and, cerebral blood flow, R883
 - oral sensory stimulation and, males, R1223
 - plasma
 - lactate metabolism, skeletal muscle (lizard), R632
 - sympathetic nerve activity and, anesthesia effects, R792
 - sympathoadrenal activation, endotoxin and, R683
 - response to, hypothalamic lesion and, perfused liver, R117
 - stimulation-induced secretion, nifedipine effects, adrenal, R28
- CKK: see Cholecystokinin
- Cellular immunity, peripheral, brain interferon- α inhibition of, R453
- Central nervous system
- angiotensin II injection, pressor response from, periaqueductal gray role in, R1052
 - cardiovascular effects, joining peptide, hypertension, R1184
 - cardiovascular regulation, baroreceptor-chemoreceptor interactions, R14
 - feeding status effects, bombesin-like peptide levels and, R420
 - interleukin-1, modulation of systemic interleukin-6 by, R739
 - interleukin-8, modulation of feeding, R877
 - laryngeal afferent input, nucleus tractus solitarius, R269
- Cephalic phase, sensory stimulation and, insulin release, males, R1223
- Cephalopod muscle, fatigue and recovery, metabolism and energetics during (squid), R157
- Cerebellum, carotid chemoreceptor integration, R811
- Cerebral arteries, circulation, nitric oxide effects (goat), R1410
- Cerebral cortex, pH and blood flow, super-hypercapnia effects, R974
- Cerebral ventricles, anteroventral third, periaqueductal gray role in central angiotensin, R1052
- Cerebrospinal fluid, interleukin-8 modulation of feeding, central nervous system, R877
- Cerebrovasodilation, fastigial stimulation, deep halothane anesthesia and, R187
- Cervix, stimulation, capsaicin, micturition and, R132
- c-fos
- expression
 - excitatory amino acid effects (hamster), R1191
 - induction of, spinal neurons, bladder, R326
 - meal-induced expression, brain stem, CCK release effects, R235
- cGMP: see Guanosine monophosphate, cyclic
- CGR: see Receptors, glucocorticoid
- Chemical irritants, stimulation of nasal mucosa, reflex vasodilation and, R733
- Chloralose, anesthesia, sympathetic nerve activity and, R792
- Chloride
- secretion, neuropeptide Y effects, rectal gland (shark), R439
 - transport, urinary bladder, DPC effects (fish), R66
 - volume-activated pathways, dissociated eel clear cells, R990
- Cholecystokinin
- anorectic mechanism for, abdominal vagotomy effects, R602
 - anorexic effects of, chronic alcohol consumption effects, R211
 - endogenous, gastric emptying of liquid nutrients and (monkey), R371
 - release
 - c-fos expression and, brain stem, R235
 - feeding and fasting effects, pancreas, R896
 - satiety and (monkey), R620
 - synergism, gastric load and, vagal afferents, R872
- Cholecystokinin octapeptide, analogues, food intake and, R481
- Cholinergic stimulation, glucose induction, meal initiation and, R1423
- Chondrocytes, localization of ANP receptors in, gill cartilage (eel), R474
- Choroid plexus, transthyretin gene expression (lizard), R982
- Circulation: see also Blood flow
- cerebral, nitric oxide effects (goat), R1410
 - gravity and, R715
 - renal medullary, control of sodium excretion, R963
- Citrate synthase, acute exercise effects, skeletal muscle, R1344
- Cold
- acclimation
 - humoral control of glucagon (duckling), R1084
 - nonshivering thermogenesis in, skeletal muscle (duckling), R1076
 - defense function, during sleep, brown fat, R1060
 - exposure, diuretic response to, R689
- Colitis, food intake suppression and, R1001
- Collagen, type III, circulating amino-terminal propeptide of, awake state (pig), R139
- Colon
- acute inflammation, suppression of food intake and, R1001
 - sodium chloride absorption, ANP inhibition of (pig), R57
- Convulsions, febrile, brain oxytocin effects, R151
- Coprodeum, embryonic, current-noise analysis of sodium absorption (chicken), R1100
- Corticosterone
- daily variations, thermopulses and, R1115
 - glucoregulation and, exercise, R1333
 - plasma, lactate metabolism, skeletal muscle (lizard), R632
 - response to, hypothalamic lesion and, perfused liver, R117
- Corticotropin-releasing factor
- central, stress and interleukin-1, R834
 - central interleukin-1, modulation of systemic interleukin-6 by, R739
 - natural killer cytotoxicity, central interferon- α inhibition, R453
 - pituitary secretion, hypothalamic peptide regulation of (sheep), R840
- Corticotropin-releasing factor test, psychoneuroendocrinology, hypertension, R1304
- Cortisol
- response, hemorrhage, blockade of cardiac nerves and, R220
 - secretion, circadian, permanent night shift workers, R261
 - thromboxane effects, fetus, R858
- C-peptides, oral sensory stimulation and, males, R1223
- CRF: see Corticotropin-releasing factor
- Cryobiology, glucose transport, plasma membrane (frog), R1036
- Cryoprotectant
- development of freeze tolerance, dehydration (frog), R1324
 - distribution, freeze-tolerance, glucose transport with (frog), R1036
 - freezing tolerance and intolerance, physiological responses (frog), R721
- Cytokines
- acute colon inflammation, feeding and, R1001
 - antagonism of, sleep and fever, R907
 - brain, natural killer cytotoxicity, R453
 - core temperature elevation, exercise-induced, R1351
 - exercise-induced core temperature elevation and, female, R1121
 - experimental cachexia, R376
 - hypothalamic, lipopolysaccharide fever, R512
 - modulation of feeding, central nervous system, R877
 - stress and, central CRF antagonist effects, R834
 - systemic and intrahypothalamic, during endotoxin fever (guinea pig), R653
- Cytotoxicity, natural killer, interferon- α inhibition of, R453
- D**
- Decerebration
- lateral tegmental field neurons, sympathetic nerve discharge and, R1006
 - oral and gastric integration, developing pups, R216
- Deconvolution, LH surge reanalysis, R240

- Dehydration
 arginine vasotocin effects, skin (toad), R426
 signals, endotoxin stimulation, R1043
 tolerance (frog), R1324
 Deltorphan, modulation of EEG and respiratory activity, fetus (lamb), R433
 Deoxyribonucleic acid, synthesis, nitric oxide and superoxide in cultured cells, R518
 Deoxyribonucleic acid, complementary, transthyretin gene expression, choroid plexus (lizard), R982
 Desmopressin, vasopressin and angiotensin actions, cardiovascular consequences of, area postrema, R625
 Devazepide, CCK satiety (monkey), R620
 Development: *see also* Growth
 freeze tolerance (frog), R1324
 genetic, adaptation to hot environment, R957
 oral habituation, gastric signals, decerebrate pups, R216
 postnatal, maternal photoperiodic history and (vole), R749
 Dexamethasone, central interleukin-1, modulation of systemic interleukin-6 by, R739
 Diabetes
 infant of diabetic mother, cerebral metabolism and electrocortical activity in (lamb), R1262
 non-insulin-dependent, muscle glycogen synthase in (monkey), R552
 Diltiazem, calcium ion flux, during sepsis, skeletal muscle, R487
 Dimethylphenylpiperazinium, adrenal catecholamine release, VIP and, R766
 1,1-Dimethyl-4-phenylpiperazinium iodide, modulation, intrinsic cardiac neuronal activity modulation, R659
 Diuresis
 endothelin-induced, pressure-dependence of, R90
 response to cold exposure, α_2 -adrenoceptor antagonism attenuation of, R689
 Dopamine
 gonadotropin II release, GABA stimulation of, R348
 microdialysis probe for sampling, R1205
 DPC, transepithelial chloride transport and, urinary bladder (fish), R66
 Drinking
 endotoxin stimulation of thirst, R1043
 response, chronic intravenous EGF infusion (sheep), R203
 suprachiasmatic oscillations, aging and, R1216
 thirst, arterial pressure and, R591
 water, endothelin actions and, brain, R1212

E

- Eccrine cells, dissociated, volume-activated potassium and chloride pathways, R990
 Edema
 cerebral, lactate and pH dissociation in, R697
 lymphatic pressure, intravenous infusions and, awake state (sheep), R703
 EDRF: *see* Endothelium-derived relaxing factor
 EEG: *see* Electroencephalography
 Ejaculatory duct, bilateral seminal emis-

- sions from, control by lumbar splanchnic nerve, R743
 Elasmobranch, urotensin II, cardiovascular actions (dogfish), R573
 Electrocortical activity, cerebral metabolism and, chronic hyperglycemia, fetus (lamb), R1262
 Electroencephalography
 activity, opioid receptor modulation of, fetus (lamb), R433
 classification of, fetus (baboon), R706
 Electrolytes
 balance, endothelin actions and, brain, R1212
 response, chronic intravenous EGF infusion (sheep), R203
 Electromyography, exposure to cold eggs, synchrony in breathing and shivering (bantam hen), R1439
 Embryo
 coprodeum, current-noise analysis of sodium absorption (chicken), R1100
 mitochondria, regulatory features of protein synthesis, R1238
 Emesis, autonomic control of, irradiation (ferret), R1092
 Enalapril, salt appetite and, R7
 Endothelin
 antidiuretic actions of, endothelin-A receptor, brain, R1212
 natriuresis and diuresis induced by, pressure-dependence of, R90
 obese hypertension, arterial α -adrenoceptor downregulation in, R798
 Endothelium-derived relaxing factor
 renal microvasculature and, aging males, R1126
 response, DOCA-salt hypertension, R568
 Endotoxin
 bacterial, fever and thermogenesis response to, macrophages, R1179
 fever induced by
 interleukin-6 and TNF during (guinea pig), R653
 intrapreoptic norepinephrine role in (guinea pig), R1369
 lethal effects, hyperthermia protection against, R1447
 plasma catecholamines in, sympathoadrenal activation, R683
 stimulation, drinking, R1043
 Energetics, muscular fatigue and recovery (squid), R157
 Energy
 balance
 antiestrogen effects, 1399, R1392
 antisense GCR gene construct, R146
 pregnancy, exercise in (hamster), R563
 tamoxifen antagonism in (hamster), R559
 production, anaerobic and aerobic, muscular fatigue (squid), R157
 Enkephalin, modulation of EEG and respiratory activity, fetus (lamb), R433
 Enteric nerves, colon, ion transport, ANP effects (pig), R57
 Enterostatin, feeding response to, adrenal-ectomy in obesity, R21
 Environment, hot, adaptation to, genetic development, R957
 Enzymes: *see also* specific enzyme
 phosphorylation, during anoxia (turtle), R1380
 Epidermal growth factor, chronic intrave-

- nous infusion, hormonal, fluid, and electrolyte response (sheep), R203
 Epinephrine
 adrenal, release, VIP effects, R766
 adrenal medullary, mediator of diet-induced hypertension, R1
 hypoglycemia and, cerebral blood flow, R883
 oral sensory stimulation and, males, R1223
 plasma
 lactate metabolism, skeletal muscle (lizard), R632
 sympathetic nerve activity and, anesthesia effects, R792
 turnover, fetal and newborn (sheep), R756
 Erythrocytes
 amino acid transport in, volume-regulatory (skate), R173
 mass, pregnancy, awake state, R399
 Erythropoietin, serum immunoreactive, pregnancy, awake state, R399
 Estradiol
 antiestrogen effects
 behavior and energy balance, R1392
 estrous behavior and energy balance (hamster), R1399
 energy balance in pregnancy, voluntary exercise role in (hamster), R563
 tamoxifen antagonism, energy balance and estrous behavior (hamster), R559
 Estrous, behavior, tamoxifen antagonism in (hamster), R559
 Ethanol, infusion, uteroplacental production of prostaglandin E_2 , R640
 Exercise
 acute, antioxidant and metabolic enzymes with, skeletal muscle, R1344
 acute phase response in, R166
 core temperature elevation induced by prostaglandin role in, female, R1121
 tumor necrosis factor and, R1351
 fluid shifts during (horse), R404
 glucoregulation, iron deficiency and, R863
 glucose transport and, muscle, obesity, R447
 heavy, glucose infusion effects on hormone secretion, R1333
 indomethacin effects, body temperature, R230
 lactate and glucose metabolism, catecholamine effects, skeletal muscle (lizard), R632
 postexercise muscle, glucosidic pathways of glycogen breakdown in (frog), R1141
 running wheel activity, period of circadian rhythm (hamster), R951
 training, renal sympathetic nerve activity and, R365
 voluntary, energy balance in pregnancy (hamster), R563

F

- Fasting
 feeding and, camostat effects on exocrine pancreas, R896
 food intake response, muscle protein synthesis and plasma insulin, R334
 hepatic glucose production, insulin action on, impairment in cancer, R356

hypertriglyceridemia, ventromedial hypothalamic obesity, R786
selective retention, essential fatty acids, R414

Fat
body, alterations in stores of, heat exposure effects, R1109
dietary, hypertension, adrenal medullary catecholamine effects, R1
starch and oil preferences, olfaction in, R1404

Fatty acids
essential, selective retention, R414
free, oral sensory stimulation in males, R1223
medium-chain, after octanoate challenge, neonate (swine), R761
oxidation, lateral parabrachial subnucleus lesion effects, R1168

Feeding
antibodies to, body temperature and feeding responses, tumor-bearing rats, R615
behavior and energy balance, antiestrogen effects, R1392, R1399
bombesin-like peptide levels and, R420
brain glycogen, parenteral nutrition effects, R1387
CCK-mediated anorexia, abdominal vagotomy effects, R602
CCK release effects, *c-fos* expression, brain stem, R235
dietary fat and glucose, hypertension, adrenal medullary catecholamine effects, R1
fasting and, camostat effects on exocrine pancreas, R896
food and water intake, salt appetite, enalapril and, R7
food deprivation, cytokines in experimental cachexia, R376
food intake
anti-TNF- α antibodies, tumor-bearing rats, cytokines, R615
CCK-8 analogue effects, R481
energy balance in pregnancy (hamster), R563
muscle protein synthesis and plasma insulin, suckling, R334
suppression of, acute colon inflammation, R1001
gustatory response to glucose, pancreatic glucagon effects, R1231
ingestive behavior, endothelin actions and, brain, R1212
inhibition, gastric load and CCK synergism, vagal afferents, R872
interleukin-8 modulation of, central nervous system, R877
lipoprivic, lateral parabrachial subnucleus lesion effects, R1168
long-term restricted, motor activity rhythm and, R467
meal initiation, experimental induction of glucose and, R1423
meal patterns, CCK satiety (monkey), R620
meal size, postpyloric stimuli and, R888
oral habituation, gastric signals, decerebrate pups, R216
postingestive conditioning, glucose-conditioned flavor preferences, R320
pressor response to, nonadrenergic control of (lamb), R530

response to enterostatin, adrenalectomy in obesity, R21
sodium appetite, R1480

Fetus: see also Placenta; Pregnancy
ACTH responses, thromboxane effects, R858
chronic hyperglycemia, cerebral metabolism and electrocortical activity (lamb), R1262
EEG classification of (baboon), R706
epinephrine turnover (sheep), R756
ethanol infusion, uteroplacental production of prostaglandin during E₂, R640
hypotension, atrial pressure effects on renin activity (lamb), R76
responses to ANF, autonomic modulation of, R596

Fever
endotoxin-induced
interleukin-6 and TNF during (guinea pig), R653
intrapreoptic norepinephrine role in (guinea pig), R1369
exercise-induced
prostaglandins and, female, R1121
tumor necrosis factor and, R1351
host defense, sustained sleep deprivation effects, R1148
MDP- and interleukin-1-induced, antagonist attenuation of, R907
response to bacterial endotoxin, macrophage-dependent mechanisms, R1179

Fibroblast growth factor, compensatory adrenal growth response and, R1253
Fibroblasts, W1-38 embryonic lung, nitric oxide and superoxide in, R518

Filtration, glomerular, impairment of, establishment of hypertension and, R943

Flavor preferences
learning
calcium and sodium, R1480
starch and oil, R1404

Flow, lymphatic, intravenous infusions and, awake state (sheep), R703

Flowmetry, laser-Doppler, cerebrovasodilation under anesthesia, R187

Fluid
balance
arginine vasotocin effects (toad), R426
endothelin actions and, brain, R1212
body, genetic development of adaptation, R957
extracellular, microdialysis probe for sampling of, R1205
response, chronic intravenous EGF infusion (sheep), R203
steady-state shifts, skeletal muscle, plasma osmolality effects, R1318

Fluorescence imaging, brain pH and blood flow, superhypercapnia effects, R974

Forebrain, anterior, bioactive hormones and blood pressure, R826

Forskolin, chloride secretion and, rectal gland (shark), R439

Freezing
survival, antioxidant defenses (snake), R646
tolerance, dehydration (frog), R1324
tolerance and intolerance, physiological responses (frog), R721

Fructose, intragastric, robust flavor preferences and, R320

G

GABA: see γ -Aminobutyric acid

Gastric antrum, immobilization-induced hypocalcemia and, R1376

Gastric emptying
acute colon inflammation, feeding and, R1001
liquid nutrient loads, endogenous CCK control of (monkey), R371

Gastric fundus, immobilization-induced hypocalcemia and, R1376

Gastrin
hypocalcemia, stomach, R1376
immobilization-induced hypoglycemia, gastric vagus mediation of, R609

Gene expression
excitatory amino acids and (hamster), R1191
transferrin, evolution in brain (lizard), R982
uncoupling protein, adipose tissue (goat), R676

Gill
cartilage, ANP receptors in, chondrocytes (eel), R474
single-pass extraction, ANP (fish), R124

Glucagon
calorigenic response to, cold acclimation, skeletal muscle (duckling), R1084
pancreatic, gustatory response to glucose and, R1231
regulation, lipolysis, liver (fish), R255
secretion, autonomic neural control, R246

Gluconeogenesis, catecholamine and corticosterone effects, skeletal muscle (lizard), R632

Glucoprivation, lateral parabrachial subnucleus lesion effects, R1168

Glucoregulation
exercise, hormone secretion and glucose production, liver, R133
mild iron deficiency effects, exhausting exercise, R863

Glucoregulatory hormones, augmented concentrations, during exhausting exercise, mild iron deficiency and, R863

Glucose
dietary, hypertension, adrenal medullary catecholamine effects, R1
disposal rate, insulin-mediated, skeletal muscle (monkey), R552
experimental induction, meal initiation and, R1423
food intake effects, suckling, R334
gustatory response to, pancreatic glucagon effects, R1231
infusion, hormone secretion and, heavy exercise, R1333
intragastric, robust flavor preferences and, R320
mild iron deficiency effects, exhausting exercise, R863
production, glucosidic pathways of, post-exercise muscle (frog), R1141
transport
cerebral, fetus (lamb), R1262
exercise and, muscle, obesity, R447
norepinephrine- and insulin-resistant, brown adipocytes, R577
plasma membrane, freeze-tolerance and (frog), R1036
uptake, insulin action on, impairment in cancer, R356

- Glucose transporters, uncoupling protein, adipose tissue (goat), R676
- α -Glucosidase, glucosidic pathways and glucose production, postexercise muscle (frog), R1141
- Glutamate, differential timing, suprachiasmatic hypothalamus, R504
- Glutathione peroxidase, acute exercise effects, skeletal muscle, R1344
- Glycine, microdialysis probe for sampling, R1205
- Glycogen
- brain, parenteral nutrition effects, R1387
 - breakdown, glucosidic pathways of, post-exercise muscle (frog), R1141
- Glycogenesis, catecholamine and corticosterone effects, skeletal muscle (lizard), R632
- Glycogenolysis, hypothalamic lesions, response to catecholamines, perfused liver, R117
- Glycogen synthase, muscle, diabetes (monkey), R552
- Gonadotropin, LH surge, deconvolution analysis, R240
- Gonadotropin II, secretion, GABA stimulation of (fish), R348
- Gravity, heart and, R715
- Growth: *see also* Development
- compensatory adrenal response, basic fibroblast growth factor mediation of, R1253
 - food intake response, muscle protein synthesis and plasma insulin, R334
- Growth hormone, photoperiod-responsive mechanisms, conservation of, R846
- Guanosine monophosphate, cyclic
- ANP actions and, thoracic inferior vena caval constriction, R1416
 - secretory mechanisms and, colonic (pig), R57
- Guanosine triphosphate
- guanosine diphosphate ratio, anoxia effects, hepatocytes (turtle), R41
 - myocardial β -adrenergic receptors, hibernation adaptations (marmot), R1430
- Gustatory response
- glucose, pancreatic glucagon effects, R1231
 - starch and oil preferences, olfaction in, R1404
- H**
- Halothane, anesthesia, cerebrovasodilation preserved in, R187
- Heart: *see also* Muscle, heart
- failure
 - brain hexokinase activity and, R923
 - pacing-induced, baroreflex impairment in, awake state, R1132 - gravity and, R715
 - intrinsic neuronal activity, modulation by nicotinic, muscarinic, and β -adrenergic agonists, R659
 - neuronal activity, modulation by adenosine, ATP, or analogues, R914
- Heart atria
- stretch, during pregnancy, renal response to, R902
 - work, muscle shortening and heart rate effects, R310
- Heart rate
- joining peptide effects, genetic hypertension, R1184
 - muscle shortening and, work from heart trabeculae, R310
 - responses to ANF, autonomic modulation of, fetus, R596
 - stress- or interleukin-1-induced response, central CRF antagonist effects, R834
- Heart ventricles, work, muscle shortening and heart rate effects, R310
- Heart ventricles, right, pacing, heart failure induced by, awake state, R1132
- Heat
- adaptation to, genetic development of, R957
 - exposure
 - body fat stores and plasma insulin levels with, R1109
 - daily variation of plasma hormones, R1115
 - production, circadian rhythms of (squirrel monkey), R781
 - treatment, endotoxin effects and, R1447
- Hemorrhage
- carotid baroreflex during, conscious and anesthetized states, R195
 - intracerebral, lactate and pH dissociation in, R697
 - vasopressin, renin, and cortisol responses, blockade of cardiac nerves and, R220
- Hepatocytes
- anoxia-tolerant
 - protein synthesis response to anoxia in (turtle), R41
 - reversible metabolic suppression, model (turtle), R49 - anoxic, microcalorimetry, R1014
 - constant membrane potential, anoxic suppression of sodium-potassium-ATPase and (turtle), R1020
- Hexokinase, activity, brain, heart failure, R923
- Hibernation
- adaptation, myocardial β -adrenergic receptors (marmot), R1430
 - freezing tolerance and intolerance, physiological responses (frog), R721
 - norepinephrine effects, protein synthesis, brown adipocytes (hamster), R103
 - selective retention, essential fatty acids, R414
- Hippocampus, bombesin-like peptide levels, feeding status effects, R420
- Histamine
- hypocalcemia, stomach, R1376
 - immobilization-induced hypoglycemia, gastric vagus mediation of, R609
 - water intake, endotoxin stimulation of thirst, R1043
- Hormonal responses, chronic intravenous EGF infusion (sheep), R203
- β -Hydroxybutyrate, plasma, after octanoate challenge, neonate (swine), R761
- 5-Hydroxyindoleacetic acid, differential timing, suprachiasmatic hypothalamus, R504
- Hypercapnia
- optical imaging during, medullary surface, R494
 - vasodilation, nitric oxide in cerebral circulation (goat), R1410
 - vasodilation in, nitric oxide effects on cerebral circulation (goat), R1410
- Hyperglycemia, chronic, cerebral metabolism and electrocortical activity, fetus (lamb), R1262
- Hyperinsulinemia, sodium-retaining actions of insulin, ANF effects, R584
- Hyperosmolality, steady-state fluid shifts and, skeletal muscle, R1318
- Hyperplasia, adrenal, basic fibroblast growth factor mediation of, R1253
- Hypertension
- diet-induced, adrenal medulla as mediator of, R1
 - DOCA-salt, EDRF response to, R568
 - establishment of, impairment of renal function and, R943
 - genetic
 - blood pressure maintenance, R180
 - cardiovascular effects of joining peptide, R1184
 - obese, arterial α -adrenoceptor downregulation in, R798
 - pioglitazone and, renal arteriolar smooth muscle, R726
 - psychoneuroendocrinology of, R1304
 - renal circulation, control of sodium excretion, R963
 - sodium-retaining actions of insulin, ANF effects, R584
- Hyperthermia, protection, endotoxin effects, R1447
- Hypertriglyceridemia, fasting, ventromedial hypothalamic obesity, R786
- Hypocalcemia
- immobilization-induced
 - gastric vagus mediation of, R609
 - stomach, R1376
- Hypoglycemia
- catecholamines and, cerebral blood flow, R883
 - insulin-induced, autonomic neural control of pancreatic polypeptide and glucagon, R246
- Hypotension
- carotid baroreflex during hemorrhage, conscious and anesthetized states, R195
 - plasma renin activity, atrial pressure effects, fetus (lamb), R76
- Hypothalamic-pituitary-adrenal axis, energy balance and lipid metabolism, GCR and, R146
- Hypothalamus
- anterior, coronary vasoconstrictor pathway from, R1311
 - bombesin-like peptide levels, feeding status effects, R420
 - gonadotropin II release, GABA stimulation of, R348
 - interleukin-6 and TNF- α , lipopolysaccharide fever, R512
 - interleukin-8 modulation of feeding, central nervous system, R877
 - lateral, supramedullary input to, R111
 - lesion, response to catecholamines, perfused liver, R117
 - subfornical organ to, angiotensin as a neurotransmitter in, R302
 - suprachiasmatic, microdialysis, R504
 - temperature regulation, systemic and intrahypothalamic cytokines in (guinea pig), R653
 - ventromedial, obesity, hypertriglyceridemia in, R786
- Hypothermia
- experimental cachexia, R376

- in hypoxia (alligator), R1339
 temperature and food intake responses, anti-TNF- α antibodies, R615
- Hypovolemia, carotid baroreflex during hemorrhage, conscious and anesthetized states, R195
- Hypoxia
 aldosterone response to, carbon dioxide/pH effects, adrenal cells, R820
 phrenic nerve responses, carotid chemoreceptor integration, R811
 temperature interaction (alligator), R1339
- I**
- α -Imidazole, acid-base regulation, temperature effects (newt and salamander), R1162
- Immune system
 host defense, sustained sleep deprivation effects, R1148
 interleukin-8 modulation of feeding, central nervous system, R877
- Indomethacin
 body temperature and, exercise, R230
 renal sensory receptor activation and, R544
- Infectious disease, host defense, sustained sleep deprivation effects, R1148
- Inflammation, nonseptic, calcium ion flux and, skeletal muscle, R487
- Insulin
 action
 impairment in cancer, R356
 muscle glycogen synthase in (monkey), R552
 daily variations, thermopulses and, R1115
 fasting hypertriglyceridemia, ventromedial hypothalamic obesity, R786
 glucoregulation and, exercise, R1333
 glucose transport resistant to, brown adipocytes, R577
 oral sensory stimulation and, males, R1223
 plasma, muscle, response to food intake, suckling, R334
 plasma levels, alterations in stores of, heat exposure effects, R1109
 regulation, lipolysis, liver (fish), R255
 sodium-retaining actions of, ANF effects, R584
- Interferon- α , central, inhibition of natural killer cytotoxicity, R453
- Interleukin, thermogenic response, macrophages and, R1179
- Interleukin-1
 acute colon inflammation, feeding and, R1001
 antagonism of, sleep and fever, R907
 stress and, central CRF antagonist effects, R834
- Interleukin-6
 experimental cachexia, R376
 hypothalamic, lipopolysaccharide fever, R512
 systemic, modulation by central interleukin-1, R739
 systemic and intrahypothalamic, during endotoxin fever (guinea pig), R653
- Interleukin-8, modulation of feeding, central nervous system, R877
- Interleukin-1 β , after exercise, muscle, R166
- Ionomycin, calcium ion flux, during sepsis, skeletal muscle, R487

- Ions, conductance, reduced, brain (turtle), R929
- Iron, deficiency, glucoregulation in, during exercise, R863
- Ischemia
 cerebral, carrier-mediated transport of lactic acid, R282
 vasodilation, nitric oxide in cerebral circulation (goat), R1410
- Isoproterenol, modulation, intrinsic cardiac neuronal activity modulation, R659

K

- Ketone bodies, after octanoate challenge, neonate (swine), R761
- Kidney
 blood flow: see Blood flow
 decapsulation, endothelin natriuresis and diuresis, R90
 effects of angiotensin, role of prostaglandins in, R1469
 function
 angiotensin II and neural control of, R392
 chronic intravenous EGF infusion (sheep), R203
 impairment, hypertension and, R943
 microvasculature, nitric oxide role in, aging males, R1126
 response, atrial stretch, during pregnancy, R902
 water excretion, vasopressin alterations, quadriplegia, R460
- Kidney medulla, circulation, control of sodium excretion, R963
- Kidney papilla, circulation, control of sodium excretion, R963
- Kidney tubules, circulation, control of sodium excretion, R963

L

- Lactate
 brain, dissociation, edema, R697
 hypoxia, temperature interaction (alligator), R1339
 metabolism, skeletal muscle (lizard), R632
 mild iron deficiency effects, exhausting exercise, R863
- Lactic acid, transport, carrier-mediated, neurons and astrocytes, R282
- Laryngeal nerve, superior, input, R269
- Larynx, afferent input, nucleus of solitary tract, R269
- Leukocytosis, insulin resistance and, R356
- LH: see Luteinizing hormone
- Lidocaine, constrictor pathway, hypothalamus to medulla, R1311
- Light, photoperiod-responsive mechanisms, conservation of, R846
- Light-dark cycle, glucose induction, meal initiation and, R1423
- Lipids
 gastric emptying, CCK control (monkey), R371
 metabolism, antisense GCR gene construct, R146
- Lipolysis
 glucagon and insulin regulation, liver (fish), R255
 selective retention, essential fatty acids, R414
- Lipopolysaccharides
 dehydration signals, thirst, R1043

- endotoxin-induced fever and (guinea pig), R1369
- fever, interleukin-6 and TNF in, hypothalamus, R512
- Lipoprotein lipase, fasting hypertriglyceridemia, ventromedial hypothalamic obesity, R786
- Lithium, clearance, sodium retention and insulin, R584
- Liver
 glucose production
 glucose infusion effects, heavy exercise, R1333
 insulin action on, impairment in cancer, R356
 lipolysis, glucagon and insulin regulation (fish), R255
 perfused, hypothalamic lesion and, response to catecholamines, R117
- sepsis, redistribution of adrenergic receptors during, R385
- Load, gastric, CCK synergism and, vagal afferents, R872
- Locomotion, integrating behavior, cardiovascular responses and, R1458
- Locus ceruleus
 cardiovascular neurons, supramedullary input to, R111
 hexokinase activity, heart failure and, R923
- Losartan
 angiotensin II and neural control, renal function, R392
 subfornical organ efferents, PVN, R302
 vasopressin and angiotensin actions, cardiovascular consequences of, area postrema, R625
- Luteinizing hormone, preestrus surge, deconvolution analysis, R240
- Lymphatics, recirculation, type III procollagen, awake state (pig), R139
- Lymphatic vessels, mesenteric, pumping, outflow pressure effects, R97

M

- Macrophages, mechanisms dependent on, fever and thermogenesis response to endotoxin, R1179
- Maternofetal exchange, potassium, R341
- MDP: see Muramyl dipeptide
- Meals: see Feeding
- Medulla oblongata, bulbospinal barosensitive cells of, α_2 -adrenoceptor-mediated, R1060
- Medullary lateral tegmental field, sympathetic oscillations and, R1026
- Melatonin
 photoperiod-responsive mechanisms, conservation of, R846
 secretion, circadian, permanent night shift workers, R261
- Membrane
 conductance, ionic, brain (turtle), R929
 plasma, glucose transport, freeze-tolerance and (frog), R1036
- Mesangial cells, renal, nitric oxide and superoxide in, R518
- Metabolic depression, anoxia-tolerant hepatocytes, model system (turtle), R49
- Metabolic enzymes, acute exercise effects, skeletal muscle, R1344
- Microcalorimetry, reversible metabolic suppression, isolated hepatocytes, R1014

- Microdialysis**
intracerebral, norepinephrine and (guinea pig), R1369
suprachiasmatic hypothalamus, R504
- Microscopy, neutrophil and interleukin-1 β**
accumulation, after exercise, muscle, R166
- Micturition, capsaicin effects, R132**
- Minoxidil, thirst, arterial pressure and, R591**
- Mitochondria, protein synthesis, regulatory features of, embryo, R1238**
- Monoacylglycerol acyltransferase, hepatic, retention of essential fatty acids, R414**
- Morphine, modulation of EEG and respiratory activity, fetus (lamb), R433**
- Motility, gastrointestinal, tachykinins (trout), R804**
- Motor activity, rhythms, long-term restricted feeding effects, R467**
- Muramyl dipeptide, antagonism of, sleep and fever, R907**
- Muscarinic agonists, intrinsic cardiac neuronal activity modulation, R659**
- Muscimol, microinjection, sympathetic nerve discharge and, R1006**
- Muscle**
exposure to cold eggs, synchrony in breathing and shivering (bantam hen), R1439
fatigue and recovery, metabolism and energetics during (squid), R157
glucose transport, exercise effects, obesity, R447
neutrophil and interleukin-1 β accumulation, after exercise, R166
postexercise, glucosidic pathways and glucose production in (frog), R1141
protein synthesis, response to food intake, suckling, R334
shortening, heart rate and work, heart muscle, R310
- Muscle, heart, work, muscle shortening and heart rate effects, R310**
- Muscle, skeletal**
acute exercise effects, antioxidant and metabolic enzymes, R1344
calcium ion flux, during sepsis, R487
calorigenic response or glucagon and, cold acclimation (duckling), R1084
glycogen synthase, diabetes (monkey), R552
lactate and glucose metabolism, catecholamines and corticosterone effects (lizard), R632
nonshivering thermogenesis, cold acclimation and (duckling), R1076
steady-state fluid shifts, plasma osmolality effects, R1318
- Muscle, smooth**
lymphatic pumping, outflow pressure effects, R97
renal arteriolar, hypertension and, pioglitazone attenuation of, R726
vascular
arterial α -adrenoceptor downregulation in, R798
hyperplasia, pioglitazone and, R726
- Myocardium, β -adrenergic receptors, hibernation adaptations (marmot), R1430**
- N**
- Naloxonazine, modulation of EEG and respiratory activity, fetus (lamb), R433**
- Naloxone**
central interleukin-1, modulation of systemic interleukin-6 by, R739
modulation of EEG and respiratory activity, fetus (lamb), R433
- Naltrindole, modulation of EEG and respiratory activity, fetus (lamb), R433**
- Nasal mucosa, chemical stimulation, reflex vasodilation and, R733**
- Natriuresis**
blood pressure maintenance, genetic hypertension, R180
endothelin-induced, pressure-dependence of, R90
- Natural killer cells, cytotoxicity, central interferon- α inhibition, R453**
- Neonate: see also Newborn**
actanoate challenge, β -hydroxybutyrate after (swine), R761
- Neural control**
angiotensin II and, renal function, R392
autonomic, pancreatic polypeptide and glucagon secretion, R246
neuropeptide Y, urinary bladder, urethra, and vas deferens, R537
pressor response to angiotensin II, pregnancy, R1270
- Neuroglucopenia, autonomic neural control, pancreatic polypeptide and glucagon, R246**
- Neuroimmunology, interleukin-8 modulation of feeding, central nervous system, R877**
- Neuroimmunomodulation, natural killer cytotoxicity, R453**
- Neurokinin A, gastrointestinal motility of, primary structures and effects (trout), R804**
- Neuronal activity, cardiac, modulation by adenosine, ATP, or analogues, R914**
- Neurons**
cardiovascular, supramedullary input to, rostral ventrolateral medulla, R111
firing responses, arterial pressure in NTS, R1355
intrinsic cardiac, purinergic modulation of, R914
lactic acid transport, carrier-mediated, R282
lateral tegmental field, sympathetic nerve discharge and, R1006
nucleus tractus solitarius, baroreceptor-chemoreceptor interactions, R14
pyramidal, reduced ionic conductance (turtle), R929
rostral ventrolateral medulla
coronary vasoconstrictor pathway from anterior hypothalamus, R1311
somatic and visceral input to, R35
spinal, responses to activation of renal receptors, R1291
supraoptic, osmotic modulation of, R1475
sympathetic preganglionic, raphe pallidus excitation of, R82
ventrolateral medulla, renal receptor stimulation effects, R290
- Neuropeptide- γ , gastrointestinal motility of, primary structures and effects (trout), R804**
- Neuropeptide Y**
chloride secretion and, rectal gland (shark), R439
inhibitory effects of, urinary bladder, urethra, and vas deferens, R537
- Neurotransmitters**
angiotensin as, subfornical organ efferents to PVN, R302
chloride secretion and, rectal gland (shark), R439
microdialysis probe for sampling, R1205
- Neutrophils, after exercise, muscle, R166**
- Newborn: see also Neonate**
blood pressure, nonadrenergic control of (lamb), R530
epinephrine turnover (sheep), R756
- Nicotinic agonists, intrinsic cardiac neuronal activity modulation, R659**
- Nifedipine, stimulation-induced catecholamine secretion and, adrenal, R28**
- Night shift, permanent, circadian cortisol and melatonin secretion in, R261**
- Nitric oxide**
cerebral circulation and
after hypercapnia and ischemia (goat), R1410
vasodilation in hypercapnia or brief ischemia (goat), R1410
DNA synthesis and, cultured cells, R518
interaction, blood flow distribution, angiotensin II, R1276
renal microvasculature and, aging males, R1126
response, DOCA-salt hypertension, R568
- Nitroprusside, response, DOCA-salt hypertension, R568**
- Noradrenalin, plasma, lactate metabolism, skeletal muscle (lizard), R632**
- Norepinephrine**
adrenal, release, VIP effects, R766
adrenal medullary, mediator of diet-induced hypertension, R1
glucose transport resistant to, brown adipocytes, R577
hypoglycemia and, cerebral blood flow, R883
intrapreoptic, role in endotoxin-induced fever (guinea pig), R1369
oral sensory stimulation and, males, R1223
plasma
lactate metabolism, skeletal muscle (lizard), R632
sympathetic nerve activity and, anesthesia effects, R792
sympathoadrenal activation, endotoxin and, R683
protein synthesis and, brown adipocytes (hamster), R103
- NTS: see Nucleus tractus solitarius**
- Nucleotides, purine, anoxia effects, hepatocytes (turtle), R41**
- Nucleus tractus solitarius**
c-fos expression, CCK release effects, R235
gustatory response to glucose, pancreatic glucagon effects, R1231
inhibition of chemoreceptor inputs to, during baroreceptor stimulation, R14
joining peptide effects, genetic hypertension, R1184
laryngeal afferent input to, R269
pressure changes in, neuronal responses to, R1355

Nutrients, liquid, gastric emptying of, CCK control (monkey), R371
 Nutrition, parenteral, brain glycogen and feeding with, R1387
 Nycthemeral rhythm, salt appetite, angiotensin-converting enzyme inhibition and, R7

O

Obesity
 adrenalectomy in, feeding response to enterostatin, R21
 body fat stores and plasma insulin levels, heat exposure and, R1115
 daily hormone variations, thermopulses and, R1115
 dietary, CCK effects, chronic alcohol consumption effects, R211
 hypertension, arterial α -adrenoceptor downregulation in, R798
 muscle glucose transport, exercise effects, R447
 ventromedial hypothalamic, fasting hypertriglyceridemia in, R786
 Oil, preferences, olfaction in, R1404
 Olfaction
 calcium and sodium, R1480
 starch and oil preference, R1404
 Oral sensory stimulation, insulin, C-peptide, and catecholamines in, males, R1223
 Oropharyngeal control, meal size, postpyloric stimuli and, R888
 Osmolytes, organic, volume-regulatory transport, erythrocytes (skate), R173
 Osmoregulation, amino acid transport, erythrocytes (skate), R173
 Osmotic modulation, steady-state, supraoptic neurons, R1475
 Ovariectomy, energy balance and, voluntary exercise role in (hamster), R563
 Oxygen
 carbon dioxide and pH effects, aldosterone, adrenal cells, R820
 delivery, temperature effects (newt and salamander), R1162
 Oxytocin
 brain, modulating vasopressin antipretic action and, R151
 pituitary secretion, hypothalamic peptide regulation of (sheep), R840
 steady-state osmotic modulation, supraoptic neurons, R1475
 vasopressin receptors, cardiac baroreflexes and, R524

P

Pacing, heart failure induced by, baroreflex impairment with, awake state, R1132
 Pancreas
 exocrine, camostat effects, fed and fasted rats, R896
 glucagon, gustatory response to glucose and, R1231
 Parabrachial nucleus, lateral, supramedullary input to, R111
 Parabrachial subnucleus, lateral, lesions, feeding and, R1168
 Paraventricular nucleus
 hexokinase activity, heart failure and, R923
 subfornical efferents to, angiotensin as a neurotransmitter, R302

Pasteur effect, microcalorimetry, anoxic hepatocytes, R1014
 Pentobarbital, anesthesia, sympathetic nerve activity and, R792
 Peptides: *see also* Polypeptides
 bombesin-like levels, feeding status effects, R420
 circadian rhythms and, suprachiasmatic nucleus, R1199
 hypothalamic, regulation of ACTH secretion, pituitary (sheep), R840
 joining, cardiovascular effects of, hypertension, R1184
 vasoactive intestinal, adrenal catecholamine release by, R766
 Periaqueductal gray
 role in pressor response, central angiotensin II, R1052
 stimulation, cardiovascular defense reaction in, R1155

pH

brain
 carrier-mediated transport of lactic acid, R282
 dissociation, edema, R697
 superhypercapnia effects, R974
 effect on aldosterone response, hypoxia, adrenal cells, R820
 intracellular, protein synthesis effects, embryo, R1238
 Phase-response relations, suprachiasmatic nucleus, somatostatin effects, R1199
 Phase shifts, light-induced, excitatory amino acid effects (hamster), R1191
 Phenylephrine, obese hypertension, arterial α -adrenoceptor downregulation in, R798
 Phosphate, metabolites of, muscle pH and, temperature effects (newt and salamander), R1162
 Phosphofructokinase, acute exercise effects, skeletal muscle, R1344
 Photoperiodic history, maternal, postnatal development of offspring and (vole), R749
 Photoperiodism
 circadian rhythm, period of, torpor effects (hamster), R951
 conservation of, R846
 Phrenic nerve, time-dependent responses, carotid afferent activation, R811
 Pineal gland, cortisol and melatonin secretion, circadian, permanent night shift workers, R261
 Pioglitazone, hypertension and, renal arteriolar smooth muscle, R726
 Pituitary, ACTH secretion, hypothalamic peptide regulation of (sheep), R840
 Placenta: *see also* Fetus; Pregnancy
 dually perfused, potassium transfer across, R341
 endocrinology, uteroplacental production of prostaglandin E_2 , R640
 epinephrine turnover, fetal and newborn (sheep), R756
 transport, inert hydrophilic solutes, R670
 Plantaris muscle, protein synthesis, response to food intake, suckling, R334
 Plasma
 osmolality
 AVP release, primary polydipsia, R1247

steady-state fluid shifts and, skeletal muscle, R1318
 Plasma hormones, daily variation, heat exposure and, R1115
 Plasticity, neural, radiation-induced emesis (ferret), R1092
 Platelets, aggregation, thromboxane effects, pregnancy, R772
 Polydipsia, primary, AVP release, R1247
 Polypeptides: *see also* Peptides
 pancreatic, autonomic neural control, R246
 Postpyloric stimuli, control, meal size, real and sham feeding, R888
 Posture, integrating behavior, cardiovascular responses and, R1458
 Potassium
 excretion, intracerebroventricular angiotensin II, R591
 transfer, dually perfused placenta, R341
 volume-activated pathways, dissociated ecdysial clear cells, R990
 Potassium channels, transfer, dually perfused placenta, R341
 Potentials, membrane, constant, suppression by anoxia (turtle), R1020
 Pregnancy: *see also* Fetus; Placenta
 atrial stretch during, renal response to, R902
 energy balance in, exercise effects (hamster), R563
 ethanol infusion, uteroplacental production of prostaglandin during E_2 , R640
 pressor response to angiotensin II, autonomic blockade of, R1270
 serum immunoreactive erythropoietin, red blood cell mass and, awake state, R399
 thromboxane, platelets and blood pressure, R772
 Pregnenolone, carbon dioxide and pH effects, aldosterone, adrenal cells, R820
 Pressor response
 angiotensin II, autonomic blockade of, pregnancy, R1270
 arterial, capsaicin effects, R132
 central angiotensin II, periaqueductal gray role in, R1052
 feeding, nonadrenergic control of (lamb), R530
 Pressure: *see also* Blood pressure
 arterial
 NTS, neuronal responses to, R1355
 responses to ANF, fetus, R596
 thirst and, R591
 thromboxane effects, pregnancy, R772
 atrial, plasma renin activity and, hypotension, fetus (lamb), R76
 interstitial, during volume expansion, angiotensin and prostaglandin effects, R1469
 intestinal lymphatic, intravenous infusions and, awake state (sheep), R703
 outflow, lymphatic pumping, R97
 tissue, gravity and the heart, R715
 Pressure-flow relations, lymphatic pumping and, R97
 Prolactin
 daily variations, thermopulses and, R1115
 photoperiod-responsive mechanisms, conservation of, R846

- Prolactin (*continued*)
 psychoneuroendocrinology, hypertension, R1304
- Proopiomelanocortin, cardiovascular effects, genetic hypertension, R1184
- Prostaglandin E₂, uteroplacental production, during ethanol infusion, R640
- Prostaglandins
 angiotensin and, during volume expansion, R1469
 body temperature and, exercise, R230
 exercise-induced core temperature elevation and, female, R1121
 obese hypertension, arterial α -adrenoceptor downregulation in, R798
 renal sensory receptor activation and, R544
- Proteinase inhibitor, differential effects, exocrine pancreas, fed and fasted rats, R896
- Proteins
 gastric emptying, CCK control (monkey), R371
 heat shock, endotoxin effects, R1447
 plasma, inhibition of brain calcium channels, anoxia (turtle), R277
 synthesis
 muscle, response to food intake, suckling, R334
 norepinephrine effects, adipocytes (hamster), R103
 phosphorylation and, during anoxia (turtle), R1380
 regulatory features, mitochondria, embryo, R1238
 response to anoxia, hepatocytes (turtle), R41
 uncoupling
 adipose tissue (goat), R676
 adrenalectomy in obesity, R21
- Protooncogene, spinal, induced by ladder stimulation, R326
- Psychoneuroendocrinology, hypertension and, R1304
- Puberty, postnatal growth, maternal photoperiodic history and (vole), R749
- Pulmonary artery, occlusion, renin regulation and, fetus (lamb), R76
- Purines, modulation, cardiac neuronal activity, R914
- PVN: see Paraventricular nucleus

Q

- Quadruplegia, renal water excretion, vasopressin alterations in, R460

R

- Radiation, autonomic control of emesis, plasticity of (ferret), R1092
- Radiotracer analysis, epinephrine turnover, fetal and newborn (sheep), R756
- Raphe pallidus, excitation, sympathetic preganglionic neurons, R82
- Receptors
 adrenergic
 biphasic intracellular redistribution during sepsis, liver, R385
 catecholamine response, hypothalamic lesion and, R117
 α -adrenergic, downregulation, obese hypertension, R798
 β -adrenergic
 adrenalectomy in obesity, R21
 myocardial, adaptation in hibernation (marmot), R1430

- ANP, localization in chondrocytes, gill cartilage (eel), R474
- atrial volume, renal response during pregnancy, R902
- baroreceptors
 arterial, thirst and urinary responses, angiotensin II, R591
 blood pressure response, exercise (horse), R409
 stimulation, chemoreceptor interactions, R14
 cardiac, hemorrhage and, R220
 CCK-A, CCK-8 suppression of food intake and, R481
 chemoreceptors, carotid integration, R811
 clearance, ANP metabolism (fish), R124
 endothelin-A, brain, antidipsogenic action of endothelin and, R1212
 glucocorticoid, antisense construct, energy balance and lipid metabolism, R146
 mechanoreceptors, gastric load and CCK synergism, vagal afferents, R872
 opioid, modulation of EEG and respiratory activity, fetus (lamb), R433
- renal
 activation of, spinal neuronal responses to, R1291
 descending modulation of, R1291
 stimulation, neurons in ventrolateral medulla, R290
 renal sensory, activation, prostaglandins and, R544
 V₁, vasopressin action and, heart rate, R524
 vasopressin, antidiuresis, sex differences in, R1284
- Rectal gland, chloride secretion, neuropeptide Y effects (shark), R439
- Reflexes
 baroreflexes
 cardiac, V₁ receptors in action of, R524
 carotid, during hemorrhage, R195
 exercise training effects, R365
 impairment, pacing-induced heart failure and, awake state, R1132
 NTS, neuronal responses to, R1355
 pressor response to angiotensin II, pregnancy, R1270
 cardiovascular, hypotension and, fetus (lamb), R76
- renal
 activation of, spinal neuronal responses to, R1291
 stimulation, neurons in ventrolateral medulla, R290
 vasodilation, chemical stimulation of nasal mucosa, R733
- Renal nerves
 afferent, prostaglandins and, R544
 ventrolateral medulla, renal receptor stimulation effects, R290
- Renin
 nitric oxide interaction, blood flow distribution and, R1276
 plasma activity
 atrial pressure effects, hypotension, fetus (lamb), R76
 renal function, R392
 salt appetite, enalapril and, R7
 thromboxane stimulation of ACTH secretion, fetal, R858
- psychoneuroendocrinology, hypertension, R1304
- response
 chronic intravenous EGF infusion (sheep), R203
 hemorrhage, blockade of cardiac nerves and, R220
- Renin-angiotensin system, blood pressure maintenance, genetic hypertension, R180
- Reproduction, gonadotropin II release, GABA stimulation of, R348
- Resistance
 adaptation, hot environment, genetic development, R957
- insulin
 glucose transporter translocation and, muscle, obesity, R447
 pioglitazone and hypertension, R726
 renal vascular, nitric oxide and, aging males, R1126
- vascular
 arginine vasotocin effects (toad), R426
 nitric oxide interaction, angiotensin II, R1276
- Respiration
 laryngeal afferent input, nucleus tractus solitarius, R269
 opioid receptor modulation of, fetus (lamb), R433
 synchrony between shivering, muscle, exposure to cold eggs (bantam hen), R1439
- Respiratory regulation
 central, baroreceptor-chemoreceptor interactions, R14
 hypothermia, hypoxia (alligator), R1339
 phrenic nerve responses, carotid chemoreceptor integration, R811
- Rhythms
 circadian
 excitatory amino acid effects (hamster), R1191
 melatonin and cortisol secretion, permanent night shift workers, R261
 microdialysis of suprachiasmatic hypothalamus, R504
 period of, torpor effects (hamster), R951
 photoperiod-responsive mechanisms, R846
 plasma hormones, heat exposure and, R1115
 somatostatin effects, suprachiasmatic nucleus, R1199
 suprachiasmatic nucleus, aging and, R1216
 thermoregulation (squirrel monkey), R781
 motor activity, long-term restricted feeding effects, R467
 sympathetic, brain stem role in, R1026
- Rostral medulla, bulbospinal barosensitive cells of, α_2 -adrenoceptor-mediated, R1060
- Rostral ventrolateral medulla
 cardiovascular neurons of, supramedullary input to, R111
- neurons
 coronary vasoconstrictor pathway from anterior hypothalamus, R1311
 somatic and visceral input to, R35
 raphe pallidus excitation, sympathetic preganglionic neurons, R82

sympathetic oscillations and, R1026
RVLM: see Rostral ventrolateral medulla

S

- Saccharin, starch and oil preferences, olfaction in, R1404
Salt, appetite, angiotensin-converting enzyme inhibition and, R7
Sarcoma
 methylcholanthrene-induced cytokines in, R376
 temperature and food intake responses, R615
Satiety
 bombesin-like peptide levels and, R420
 CCK (monkey), R620
 chronic alcohol consumption effects, R211
 food intake, CCK-8 analogue effects, R481
 meal size, postpyloric stimuli and, R888
Seminal tract, bilateral emissions, control by lumbar splanchnic nerve, R743
Sepsis
 calcium ion flux during, skeletal muscle, R487
 hyperthermia protection, R1447
 liver, redistribution of adrenergic receptors during, R385
Septicemia, host defense, sustained sleep deprivation effects, R1148
Serotonin
 anorectic mechanism for, abdominal vagotomy effects, R602
 differential timing, suprachiasmatic hypothalamus, R504
Sex differences
 antidiuretic activity, vasopressin, R1284
 endothelium-derived relaxing factor, renal microvasculature and, R1126
 exercise-induced fever, prostaglandin role in, R1121
 oral sensory stimulation in males, R1223
Sex steroids, gonadotropin II release, GABA stimulation of, R348
Shivering, synchrony between breathing, muscle, exposure to cold eggs (bantam hen), R1439
Skin, arginine vasotocin effects (toad), R426
Sleep
 cold-defense function during, brown fat, R1060
 deprivation, sustained, host defense and, R1148
 MDP- and interleukin-1-induced, antagonist attenuation of, R907
Sodium
 absorption, current-noise analysis, embryonic coprodeum (chicken), R1100
 excretion
 insulin and, ANF effects, R584
 intracerebroventricular angiotensin II, R591
 renal, ANP actions, R1416
 renal medullary circulation and, R963
 urinary, angiotensin II and neural control, R392
 urinary, prostaglandins and, R544
 latent learning, R1480
 reabsorption, proximal, angiotensin and prostaglandin effects, R1469
Sodium channels, embryonic coprodeum, current-noise analysis (chicken), R1100

- Sodium chloride, absorption, ANP inhibition of, colon (pig), R57
Sodium-potassium-ATPase
 anoxic suppression of, hepatocytes (turtle), R1020
 transfer, dually perfused placenta, R341
Soleus muscle
 calcium ion flux, during sepsis, R487
 protein synthesis, response to food intake, suckling, R334
Solutes, hydrophilic, transfer across placenta, R670
Somatostatin, circadian rhythms and, suprachiasmatic nucleus, R1199
Spectroscopy, nuclear magnetic resonance, lactate and pH dissociation in edema, R697
Spinal cord
 exposure to cold eggs, synchrony in breathing and shivering (bantam hen), R1439
 sympathetic preganglionic neurons, raphe pallidus excitation of, R82
Spine, neuronal responses, activation of renal receptors, R1291
Splanchnic nerve
 activity, raphe pallidus excitation of, R82
 lumbar, control of bilateral seminal emissions, R743
 stimulation, adrenal catecholamine secretion, nifedipine and, R28
Spleen
 blood pressure response, treadmill exercise (horse), R409
 fluid shifts, exercise and (horse), R404
Splenectomy, blood pressure response, treadmill exercise (horse), R409
Starch, preferences, olfaction in, R1404
Stomach, immobilization-induced hypocalcemia and, R1376
 gastric vagus mediation of, R609
Stress
 interleukin-1 and, central CRF antagonist effects, R834
 oxidative, antioxidant defenses (snake), R646
Structure-activity relations, CCK-8 analogue effects, food intake, R481
Subfornical organ, efferents, paraventricular nucleus, angiotensin and, R302
Substance P
 gastrointestinal motility of, primary structures and effects (trout), R804
 renal sensory receptor activation by, prostaglandins in, R544
Succinate dehydrogenase, acute exercise effects, skeletal muscle, R1344
Suckling, food intake response, muscle protein synthesis and plasma insulin, R334
Superhypercapnia, effects on pH and blood flow, cortical, R974
Superoxide, DNA synthesis and, cultured cells, R518
Superoxide dismutase
 acute exercise effects, skeletal muscle, R1344
 defenses, freezing and anoxia survival (snake), R646
Suprachiasmatic nucleus
 c-fos expression and phase shifts in, excitatory amino acid effects (hamster), R1191

- circadian rhythms, somatostatin effects, R1199
 oscillation, aging and, R1216
Suramin, mediation, compensatory adrenal growth response, R1253
Sweat gland, dissociated eccrine cells, volume-activated potassium and chloride pathways, R990
Sympathetic nerves
 activity
 raphe pallidus excitation of, R82
 renal, genetic hypertension, R180
 cardiac and renal, anesthesia effects, R792
 discharge
 lateral tegmental field neurons in, R1006
 oscillations in, brain stem role in, R1026
 renal, activity, exercise training effects, R365
 splenic, natural killer cytotoxicity, R453
Sympathetic nervous system, adrenal medulla, mediator of diet-induced hypertension, R1
Sympathoadrenal activation, plasma catecholamines, endotoxin, R683
Sympathochromaffin system, hypoglycemic activation of, unaltered cerebral blood flow during, R883

T

- Tachycardia, pacing-induced, awake state, R1132
Tachykinins, gastrointestinal motility of, primary structures and effects (trout), R804
Tamoxifen
 antagonism, energy balance and estrous behavior (hamster), R559
 antiestrogen effects, behavior and energy balance, R1392
Taste: see Gustatory response
Telemetry, integrating behavior, cardiovascular responses and, R1458
Temperature
 circadian rhythm, period of, torpor effects (hamster), R951
 interaction with hypoxia (alligator), R1339
 regulation, circadian rhythms of (squirrel monkey), R781
Temperature, body
 core
 exercise-induced elevation, prostaglandin role in, female, R1121
 exercise-induced elevation, tumor necrosis factor and, R1351
 indomethacin effects, during exercise, R230
 muscle pH, phosphate metabolites and (newt and salamander), R1162
 photoperiod-responsive mechanisms, conservation of, R846
 regulation
 genetic development of, R957
 interleukin-6 and TNF in, hypothalamus, R512
 systemic and intrahypothalamic cytokines in (guinea pig), R653
 response, anti-TNF- α antibodies, tumor-bearing rats, R615
 stress- or interleukin-1-induced response, central CRF antagonist effects, R834

- Temperature, body (*continued*)
suprachiasmatic oscillations, aging and, R1216
- Theophylline, chloride secretion and, rectal gland (shark), R439
- Thermogenesis
cold-defense function, during sleep, brown fat, R1060
glucose transport, norepinephrine- and insulin-resistant, brown adipocytes, R577
nonshivering
cold acclimation and, skeletal muscle (duckling), R1076
norepinephrine effects on adipocytes (hamster), R103
response to bacterial endotoxin, macrophage-dependent mechanisms, R1179
uncoupling protein, adipose tissue (goat), R676
- Thermopulses, plasma hormones and, R115
- Thermoregulation
calorigenic response to glucagon, cold acclimation, skeletal muscle (duckling), R1064
circadian rhythms of (squirrel monkey), R781
cold acclimation, skeletal muscle (duckling), R1076
hypoxia interactions, temperature (alligator), R1339
induced by stress or interleukin-1, central CRF antagonist effects, R834
- Thirst: *see* Drinking
- Thromboxane, stimulation, ACTH secretion, fetal, R858
- Thyroid hormone, transthyretin gene expression, choroid plexus (lizard), R982
- Thyrotropin, photoperiod-responsive mechanisms, conservation of, R846
- Thyroxine, transthyretin gene expression, choroid plexus (lizard), R982
- TNF- α : *see* Tumor necrosis factor- α
- Torpor, circadian rhythm period and (hamster), R951
- Transthyretin, gene expression, evolution in brain (lizard), R982
- Triacylglycerol lipase, phosphorylation, glucagon and insulin regulation of lipolysis and (fish), R255
- Triglycerides
secretion rate, ventromedial hypothalamic obesity, R786
serum, energy balance and, GCR effects, R146
- Tumor necrosis factor
core temperature elevation, exercise-induced, R1351
experimental cachexia, R376
systemic and intrahypothalamic, during endotoxin fever (guinea pig), R653

Tumor necrosis factor- α , hypothalamic, lipopolysaccharide fever, R512

U

- Urea, production, protein synthesis response to anoxia in (turtle), R41
- Urethra, neuropeptide Y inhibitory effects, R537
- Urinary bladder
chloride transport, transepithelial, DPC effects (fish), R66
micturition, capsaicin effects, R132
neuropeptide Y inhibitory effects, R537
stimulation, spinal c-fos induced by, R326
- Urine
concentration and dilution, renal medullary circulation and, R963
flow rate, ANF effects, fetus, R596
output, atrial stretch and, pregnancy, R902
- Urotensin II, cardiovascular actions (dogfish), R573
- Uterus, tamoxifen antagonism, energy balance and estrous behavior (hamster), R559

V

- Vagina, stimulation, capsaicin, micturition and, R132
- Vagotomy, abdominal, CCK-mediated anorexia and, R602
- Vagus nerve
gastric, hypocalcemia and, R609
vagotomy, CCK-mediated anorexia and, R602
- Valinomycin, dissociated eccrine cells, volume-activated potassium and chloride pathways, R990
- Vasa recta, circulation, control of sodium excretion, R963
- Vas deferens, neuropeptide Y inhibitory effects, R537
- Vasoconstriction, coronary pathway, anterior hypothalamus, R1311
- Vasoconstrictors, urotensin II (dogfish), R573
- Vasodilation
hindlimb, dorsal periaqueductal gray stimulation effects, R1155
reflex, chemical stimulation of nasal mucosa, R733
- Vasopressin: *see also* Antidiuretic hormone
alterations, renal water excretion, quadriplegia, R460
antidiuretic activity of, sex differences in, R1284
antipyrretic action, brain oxytocin effects, R151
blood pressure and, anterior forebrain, R826
diuretic responses, cold exposure, R689
microinjection, area postrema, cardiovascular consequences of, R625

- response, hemorrhage, blockade of cardiac nerves and, R220
steady-state osmotic modulation, supraoptic neurons, R1475
V₁ receptors, cardiac baroreflex and, R524
- Vasopressin, arginine
ACTH secretion, thromboxane stimulation of, fetal, R858
osmotically stimulated release, primary polydipsia, R1247
renal vasodilation and, awake state, R934
- Vasotocin, arginine, vascular effects, skin (toad), R426
- Vena cava, thoracic inferior, constriction, ANP actions on, R1416
- Ventricles: *see* Cerebral ventricles; Heart ventricles
- Ventrolateral medulla
neurons, renal receptor stimulation effects, R290
surface, optical imaging during hypercapnia, R494
- Vessels, collapsible, gravity and the heart, R715
- VIP: *see* Peptides, vasoactive intestinal
- Volume: *see also* Blood volume
cell
eccrine clear cells, potassium and chloride pathways in, R990
hyperosmolality effects, skeletal muscle, R1318
regulation, freeze tolerance and (frog), R1324
expansion, angiotensin and prostaglandins in, R1469
plasma
decreased, exercise and (horse), R404
pregnancy, awake state, R399
regulation, amino acid transport, erythrocytes (skate), R173
urine, intracerebroventricular angiotensin II, R591

W

- Water
balance, intracerebroventricular angiotensin II, R591
deprivation, vasopressin and renal blood flow, awake state, R934
excretion, renal, vasopressin effects, quadriplegia, R460
intake, endotoxin stimulation of thirst, R1043
- Weight
body
antiestrogen effects, 1399, R1392
tamoxifen effects (hamster), R559
kidney, impairment of function, hypertension and, R943

Y

- Yohimbine, diuretic responses, cold exposure, R689
